DOSE CONTROL THROUGH BLUETOOTH

INNOVATION AND DEVELOPMENT
TAILORED TO YOUR NEEDS

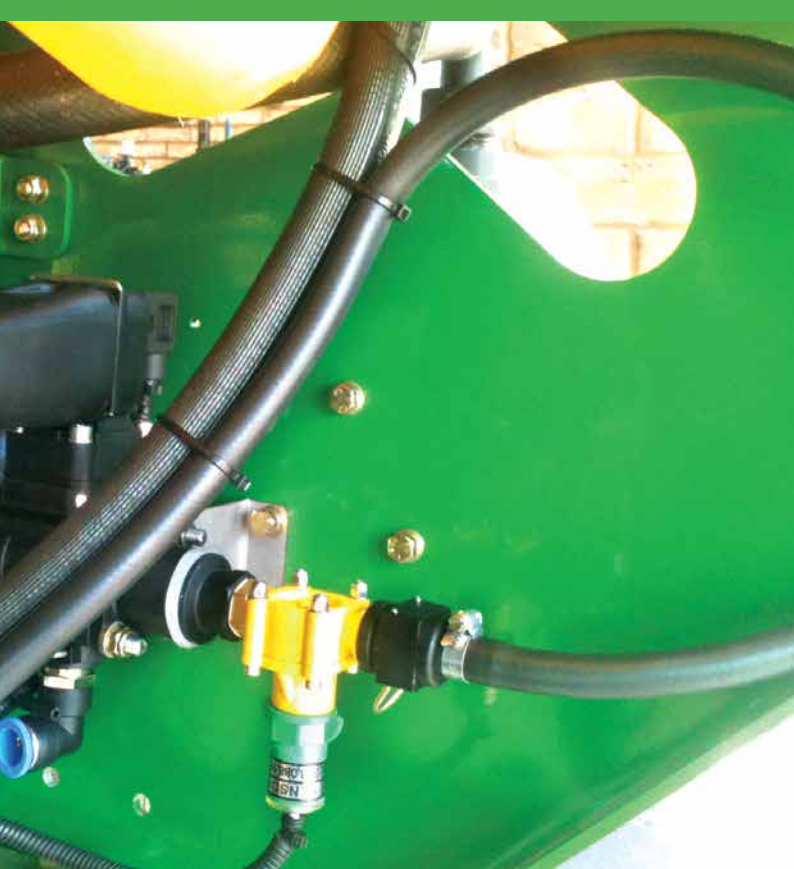

This tool allows you to control dosage equipment by using any ANDROID device with bluetooth. It offers a low-cost solution, allowing you to expand the use of technology by tearing down cost barriers.

FEATURES

This low-cost solution is ideal to control simple solid or liquid application devices at fixed rate. It allows for even applications regardless of the working speed.

The solution is configured through a cellphone app with android operating system.

APPLICATIONS

The dosage BlueTooth controller can be used in:

- Broadcast fertilizers.
- Inoculants drivers on seeders.
- Vinasse Applicators with piston/diaphragm pump.
- Forest fertilizers.
- Fertilizers with electric valves command.

OPERATION

With this app in your Android cellphone, you can calibrate the machine and carry out function tests.

The driver is self-contained, which means that once configured, you can disconnect the phone and go out to work; you may even turn it off and it will continue with the last settings when turned on later. It has its own speed measurement to keep the set dose at all times.

COMPATIBLE SOLID AND LIQUID DOSERS

Pump for liquid applications

Spray command

Volumetric doser for granular

Hydraulic motor with electronic control
